# DAIRYFINE-ZC AMINOWAY

It is an innovative product that revolutionized the essential trace mineral delivery based amino acid transport system for more effective absorption which was conventionally done through metal transport system. Based on balanced anion-cation chemistry it is a metal-amino acid complex which can be fed both in solution and dry feed programs. It is more stable and passes through rumen environment and delivers in intestine.

## KEY BENEFITS

- ◆ It is more efficient as it uses better amino acid transport system.
- ◆ It is absorbed into enterocyte and released into bloodstream.
- ◆ It is more stable as passes through rumen environment intact.
- ◆ Effective pathway ensure trace minerals reach targeted vital organs, tissues and enzyme systems.
- ◆ It replaces rumen protected or coated Lysine.
- ◆ It replaces organic trace minerals.

## USES OF DAIRYFINE-ZC AMINOWAY

- ◆ It provides vital Zinc & Copper with two deficient amino acids.
- ◆ Highest efficacy ensures better animal health & overall performance.
- ◆ Its impact can be evidently seen in immunity, bone, joints, reproduction, skin and energy levels.
- ◆ It improves milk quantity and quality simultaneously.

**Storage:** 25 Kg BOPP laminated bag with polythene liner.
